

To whom it may concern,

I own 2 XM Radio's, and I use both of them (depending on which vehicle I use, either my Freightliner Columbia, or my Dodge Grand Caravan). I am a Over-The-Road driver, and the Traffic and Weather Channels on XM Radio do me justice when I have to know what is ahead of me so I can make changes to my route and not be delayed.

I am subject to the new Federal Hours of Service which makes my travel time, and my pick-up and delivery times all come together in a smaller time package.

I stronly urge that XM Radio be allowed to keep the afore mentioned channels where they are and not be removed by money and power hungry broadcasters.

Change is Good!!!
